Supplementary Figure 1. Fetal Testis Histopathology. No histological changes due to TCDD exposure were observed. Top panels: low magnification image. Bar = 200 μm. Middle panels: middle magnification image. Bar = 100 μm. Lower panels: high magnification image. Bar = 50 μm. A) Control GD 8-20 exposure paradigm; B) Control GD 15 exposure paradigm; C) 10 TCDD GD 8-20 exposure paradigm; D) 10 TCDD GD 15 exposure paradigm.
