

ontology: BP

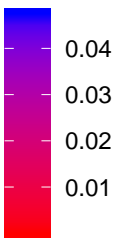

GO:0007187: G-protein coupled receptor signaling pathway
GO:0007188: G-protein coupled receptor signaling pathway
GO:0007193: G-protein coupled receptor signaling pathway
potassium ion transport
second-messenger-mediated signaling
cyclic-nucleotide-mediated signaling
GO:0007200: G-protein coupled receptor signaling pathway
neuropeptide signaling pathway
cellular potassium ion transport
potassium ion transmembrane transport
regulation of cell morphogenesis
covalent chromatin modification
histone modification
protein dephosphorylation
adherens junction organization
dephosphorylation
regulation of GTPase activity
regulation of cell shape
organic acid catabolic process
carboxylic acid catabolic process
small molecule catabolic process
dendrite development
cell-substrate adhesion
coenzyme metabolic process
protein localization to nucleus
regulation of neuron projection development
peptidyl-serine phosphorylation
